- web-scrapping/Playwright
- odoo-online basics

PROFILE

Motivated Python Backend Intern Developer with a passion for creating efficient and scalable solutions. Demonstrated ability to design, develop, and deploy robust backend applications. Eager to contribute technical expertise and collaborate with cross-functional teams to drive innovation and excellence. Proven skills in problem-solving and a strong foundation in backend technologies.

PERSONAL PROJECTS

2023.10- 2024.02

Freshshop
Online shop
This website is an online store that sells a variety of fruits and vegetables. I used django web framework to build this website. Basically, the frontend part of this website is built according to a ready-made template. However, I made the site more convenient by making changes in many html, css and javascript parts.

2023.11- 2024.01

Backend of Booking.com
Travel website backend
This project is the backend part of booking.com, built using RESTful API technology. We worked as a team to create this project. As a team leader, I was responsible for organizing the main part of the project and integrating the work of the team.

2024.02- 2024.03

LazaProject
Backend of Online Shop Mobile Application
In this project, we collectively created the backend part of the online shop called Laza. I participated in this project as a team captain. I created the git upload, modeling, docker and search parts of this project. The project is built on fastapi framework and integrated with google cloud,
